A5. Detector type: Hand Held Other	A6. Units: CPS CPM A7. Screening c	riteria:					
A8. Background reading: A9. Model	number: A10. Serial number:						
A11. Has the individual received nuclear medicine or	radiation therapy procedures during the last 30 days?	☐ Yes ☐ No					
A12. Were you given instructions on how to clean you	ır belongings? ☐ Yes ☐ No						
Initial Evaluation	After First Decontamination	After Second Decontamination					

Barcode or ID Number:

Note:

If no contamination is found then write 'N/A'.

After the initial Evaluation it is necessary to check previously clean areas to confirm no contamination migration during cleaning.

#### **INSTRUCTIONS**

DECON.	DECONTAMINATION			
A1	Name of individual entering CRC in last name, first name, middle initial format			
A2	Date individual enters CRC in month, day, year format			
A3	Time individual enters CRC using 24 hour clock (i.e. 1:15 pm is 13:15)			
A4	Name of person performing radiation contamination screening			
A5	Type of radiation detector being used for radiation contamination screening			
A6	Units associated with radiation detector being used for radiation contamination screening. Counts Per Second (CPS) or Counts per Minute (CPM)			
A7	Screening criteria being used for radiation contamination screening			
A8	Background reading with radiation detector used for radiation screening			
A9	Model number of radiation detector used for radiation screening			
A10	Serial number of radiation detector used for radiation screening			
A11	Individuals' history of nuclear medicine or radiation therapy procedures during the last 30 days.			
A12	Indicate whether the individual has been given instructions on how to clean personal belongings. If no, give individual instructions.			
A13a	If contamination is found on the <b>front</b> of the individual's <b>head/neck</b> during initial decontamination screening, indicate measurement and whether it was on the left or right side of the body.			
A13b	If contamination is found on the <b>back</b> of the individual's <b>head/neck</b> during initial decontamination screening, indicate measurement and whether it was on the left or right side of the body.			
A14a	If contamination is found on the <b>front</b> of the individual's <b>trunk</b> during initial decontamination screening, indicate measurement and whether it was on the left or right side of the body.			
A14b	If contamination is found on the <b>back</b> of the individual's <b>trunk</b> during initial decontamination screening, indicate measurement and whether it was on the left or right side of the body.			
A15a	If contamination is found on the <b>front</b> of the individual's <b>right arm</b> during initial decontamination screening, indicate measurement.			
A15b	If contamination is found on the <b>back</b> of the individual's <b>right arm</b> during initial decontamination screening, indicate measurement.			
A16a	If contamination is found on the <b>front</b> of the individual's <b>left arm</b> during initial decontamination screening, indicate measurement.			
A16b	If contamination is found on the back of the individual's left arm during initial decontamination screening, indicate measurement.			
A17a	If contamination is found on the <b>front</b> of the individual's <b>right leg</b> during initial decontamination screening, indicate measurement.			
A17b	If contamination is found on the back of the individual's right leg during initial decontamination screening, indicate measurement.			
A18a	If contamination is found on the front of the individual's left leg during initial decontamination screening, indicate measurement.			
A18b	If contamination is found on the back of the individual's left leg during initial decontamination screening, indicate measurement.			
A19a	If contamination is found on the <b>front</b> of the individual's <b>head/neck</b> after first decontamination screening, indicate measurement and whether it was on the left or right side of the body.			
A19b	If contamination is found on the <b>back</b> of the individual's <b>head/neck</b> after first decontamination screening, indicate measurement and whether it was on the left or right side of the body.
